WO 2005/068640 PCT/US2004/042980

CLAIMS

What is claimed is:

10

20

30

1. An expression vector useful for immunizing a host comprising nucleic acid sequences encoding modified KSA.

- 5 2. The expression vector of claim 1 wherein the vector is a plasmid or a viral vector.
 - 3. The expression vector of claim 2 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
 - 4. The expression vector of claim 3 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
 - 5. The expression vector of claim 4 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).
 - 6. The expression vector of claim 1 further comprising at least one additional tumorassociated antigen.
- 15 7. The expression vector of claim 6 wherein the vector is a plasmid or a viral vector.
 - 8. The expression vector of claim 7 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
 - 9. The expression vector of claim 8 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
 - 10. The expression vector of claim 9 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).
 - 11. The expression vector of claim 1 further comprising at least one nucleic sequence encoding an angiogenesis-associated antigen.
- 25 12. The expression vector of claim 11 wherein the vector is a plasmid or a viral vector.
 - 13. The expression vector of claim 12 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
 - 14. The expression vector of claim 13 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
 - 15. The expression vector of claim 14 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).

WO 2005/068640 PCT/US2004/042980

16. The expression vector of claim 6 further comprising at least one nucleic sequence encoding an angiogenesis-associated antigen.

17. The expression vector of claim 16 wherein the vector is a plasmid or a viral vector.

5

10

20

25

30

- 18. The expression vector of claim 17 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
- 19. The expression vector of claim 17 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
- 20. The poxvirus of claim 18 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).
 - 21. The expression vector of claim 1, 6, 11 or 16 further comprising at least one nucleic acid sequence encoding a co-stimulatory component.
 - 22. The expression vector of claim 21 wherein the co-stimulatory component is selected from the group consisting of B7.1, LFA-3 and ICAM-1.
- 15 23. The expression vector of claim 22 or 23 wherein the vector is a plasmid or a viral vector.
 - 24. The expression vector of claim 23 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
 - 25. The expression vector of claim 24 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
 - 26. The poxvirus of claim 25 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).
 - 27. A composition comprising an expression vector in a pharmaceutically acceptable carrier, said vector comprising nucleic acid sequences encoding modified KSA.
 - 28. The expression vector of claim 27 wherein the vector is a plasmid or a viral vector.
 - 29. The expression vector of claim 28 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
 - 30. The expression vector of claim 29 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
 - 31. The poxvirus of claim 30 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).

WO 2005/068640 PCT/US2004/042980

32. A method for preventing or treating cancer comprising administering to a host an expression vector comprising nucleic acid sequences encoding modified KSA.

33. The expression vector of claim 32 wherein the vector is a plasmid or a viral vector.

5

10

- 34. The expression vector of claim 33 wherein the viral vector is selected from the group consisting of poxvirus, adenovirus, retrovirus, herpesvirus, and adeno-associated virus.
- 35. The expression vector of claim 34 wherein the viral vector is a poxvirus selected from the group consisting of vaccinia, MVA, NYVAC, avipox, canarypox, ALVAC, ALVAC(2), fowlpox, and TROVAC.
- 36. The poxvirus of claim 35 wherein the viral vector is a poxvirus selected from the group consisting of NYVAC, ALVAC, and ALVAC(2).
 - 36. An isolated DNA molecule comprising the modified KSA coding sequence illustrated in Figure 3.
- 36. An isolated DNA molecule comprising a nucleotide sequence encoding modified KSA having the amino acid sequence shown in Figure 3.
- 37. An isolated DNA molecule comprising CEA, p53, and modified KSA coding sequences, the CEA sequence being CEA-CAP1-6D-1,2 as illustrated in Figure 2, the p53 sequence being the p53 sequence illustrated in Figure 1, and the modified KSA sequence being that shown in Figure 3.
